

Fadil Nugroho

West Jakarta, DKI Jakarta | (+62) 878-7379-7067 | fadil.nugroho124@gmail.com | [LinkedIn](#)

PROFILE

Computer Science undergraduate with experience developing reliable backend systems in production-grade environments. Strong foundation in Python, database design, and RESTful API development, with experience building data-intensive applications using Django and PostgreSQL. Also experienced in data analysis and computational methods through academic and research projects. Combines solid software engineering practices with analytical thinking and adaptability across technical domains.

EDUCATION

BINUS University

Jakarta, Indonesia

Bachelor's of Science, Computer Science

Sept 2022 - Present

Focus : Database Technology

Grade : 3.44

EXPERIENCE

IDEMIA - Software Engineer Intern

Feb 2025 - Feb 2026

- Developed and deployed a **Django-based asset management system** supporting card allocation, lifecycle tracking, and approval workflows with full audit traceability
- Designed **modular backend architecture** with PostgreSQL optimization to ensure data accuracy, consistency, and scalability.
- Collaborated with multiple departments to collect user feedback and iteratively improve UX and feature scalability.
- Built and consumed **RESTful APIs** to synchronize data in real time with external systems, ensuring reliable reconciliation across platforms.
- Led the **TCMS Showcase** presentation to internal stakeholders at the IDEMIA Jakarta site, demonstrating system impact on operational efficiency and compliance.
- Built **CI/CD pipelines using Jenkins** to automate testing and deployment, improving system reliability and release confidence.

SPCE Esports - Professional player

Jan 2020 - July 2020

- **Led and managed team strategies and communication** in competitive esports tournaments.
- Developed real-time **decision-making, leadership, and team coordination** skills.

SKILLS

Programming Languages :Python, Go, Java, SQL, JavaScript, Swift, R

Programming Tools / Framework : Django, SwiftUI, Celery, React, Node.js, Jenkins, Docker, Git, JIRA

Concepts: REST API Development, Full-Stack Web Development, Database Design, CI/CD, Agile/Scrum, UI/UX Design, RNA-seq Data Analysis, Hierarchical Clustering, Statistical Modeling, Genomic Data Processing, Exploratory Data Analysis (EDA), Data Visualization

Soft Skills: Experienced as a leader in projects and team, effective communication, strong problem-solving abilities, excellent teamwork and collaboration, efficient time management, and adaptable to new environments and technologies.

CERTIFICATION

• Cloud Practitioner Essentials - Dicoding Indonesia	Mar 2024
• Data Analytics for Business - Udemy	Oct 2024
• SQL (Intermediate) - HackerRank	Nov 2024
• Quantum Computing & Quantum Machine Learning - Udemy	Nov 2025
• Introduction to Genomic Technologies - The Johns Hopkins University	Feb 2026
• Bioinformatics Methods I - University of Toronto	Feb 2026

PUBLICATION

Fadil Nugroho, Fabiano Salmaen Intama. *"Significance of Big Data Analytics and Internet of Things Aspects in Sustainability: A Systematic Literature Review."* Presented at the 2024 IEEE International Seminar on Application for Technology of Information and Communication ([iSemantic](#)).

PROJECTS

TEST CARD MANAGEMENT SYSTEM - WEB DEVELOPMENT Feb 2025 - Feb 2026

Project Developer

- Built a **centralized backend platform** to manage asset inventory, approvals, and allocation with strong emphasis on data integrity and auditability.
- Integrated **LDAP authentication, automated email alerts, and audit reporting** to support compliance and operational transparency.
- Connected TCMS with an Asset Management System through **REST API** for real-time synchronization.
- Optimized database queries and schema design in PostgreSQL to support reporting and operational monitoring use cases.

ONLINE VOTING SYSTEM WEB DEVELOPMENT May 2024

Project Leader

- **Led a team** in developing an "Online Voting System" using HTML, CSS, JavaScript, PHP, and SQL, ensuring a secure and user-friendly platform.
- **Managed the project timeline** and team collaboration, resulting in successful project completion within the assigned deadline.
- **Gained hands-on experience** in full-stack web development and strengthened leadership and problem-solving skills through this group project.

AIRCLONE - MOBILE APP DEVELOPMENT August 2024

Project Developer

- **Developed "AirClone,"** a Swift-based mobile application inspired by Airbnb, featuring similar functionalities for booking and listing accommodations.
- Implemented user authentication, search filters, and reservation systems using **SwiftUI** and local storage.
- **Handled both front-end and back-end development,** integrating APIs and managing data flow within the app for real-time updates and user interactions.

WATCHGOODS - WEB DEVELOPMENT June 2023

Project Developer

- Developed a basic watch store website for a Human and Computer Interaction course individual project using HTML, CSS, and JavaScript.
- Designed the user interface and experience (UI/UX) to create an intuitive and visually appealing layout that improved user engagement and accessibility across multiple devices.
